# NEW FULL MOON DAY NEWSLETTER

BIBLICAL NEW MOON = THE FULL MOON

“Likewise, the people of the land shall worship at the entrance to this gateway before the Heavenly Father on the Sabbaths and the New moons 🌕.” Ezekiel 46:3

(English Biblical Translations ERROR - in Hebrew - *chôdesh* from H2318; means the new moon; by implication, a month: - month (-ly), new moon 🌕 = a beginning of a new month)

## THOUGHT OF THE MONTH

Dear Readers

This January brings us a parade of planets worthy of our homage! It forces one to actually want to look deeper into the **FOUR ANCIENT CULTS** - Stellar, Lunar, Solar, and Saturnian.

*“The falsification of history has done more to mislead humans than any single thing known to mankind”* - Jean Jacques Rousseau

As Jean Rousseau confirms - scholars, academics and the majority of the world’s populace seem **completely unaware** of the fact that there were at least **four great cults in the ancient world**, with one following and supplanting another as the centuries advanced. Each Cult, until the point when they joined together, absorbed the mythologies and beliefs of those that preceded it. All used astrology but each Cult made changes to the lexicon of the past, to the canon of the Gnosis regarding this subject of subjects. **We are inheritors of all these contentions and alterations.** And from our pedestal, looking back through the generations, we have analyzed but a true perspective.

**Our Heavenly Father blessed us with His clock and calendar and knowledge of the stars and their signs but it was all manipulated into so many falsehoods...**

The lives and beliefs of our earliest Biblical predecessors have especially been obscured by time and the fact that much was destroyed or made obsolete, makes it very difficult to find the truth. Moreover, our perspectives have been consciously distorted by syncretism (religious pagan influences) within the post-cabal teachings, by those at the helm of the faculties of history, anthropology, mythology, and religion etc. When the great Cults finally decided to unite their forces and, instead of being in constant competition for the minds of men, to make it all so much easier for themselves by consolidating resources and agendas, humanity was doomed. This event of monumental importance, the forming of the **world’s first**

**corporation**, occurred in the area today referred to as **"Israel."**

Though the traditional histories avoid this fact, it is spoken of allegorically, in the Bible and in other tales and fictions. The history of astrology, myth and religion, as well as the theories advanced here, cannot be fully understood without a deep study of these cults. Israel is the "Holy Land" and the locale from which, what we know as Judeo-Christianity, arose. We cannot understand much about this until we approach it from the background of Astro-Theology and the great cults. It is the combining of methods and domains of space science with systematic theology.

The coming together of the Cults did not happen overnight. It was a long and tedious process. The major denominations, like those of today, were no lovers of each other. It was **financial and material incentives** which motivated them to combine their resources and intentions. **Trade routes, power over the minds of men, and domination of the Earth** was all for the taking, and it was too much to resist. Moreover, each Cult's hierarchy feared that the other Cults might unite against them. So, because of this fear, and because of insatiable greed, each Cult agreed that confederation was expedient. From the time of their infernal pact, they realized that all that was needed for total dominion over minds and land, was the ability to convincingly wave "God" in people's faces and to **create "strawmen"**. Read about the Hegelian Dialectics and Conspiracy. From that point onward the rest would be easy. **The Old Testament contains the story of this coming together.** The elite dynasties of these Cults operate, through their descendants, in this world today, and are extremely powerful. The Empire (Rome) gradually absorbed and adapted to its own ends the multitude of cults derived from all its parts and over the ensuing centuries coupled them together as one, the Roman universal church. Simon Magus (the false Peter) played a crucial role in the false foundation of the Catholic church which its false claim for papal supremacy is anchored in. **Today, it is called the Roman Catholic church.**

Henceforth, much of the literature then written was aimed at promoting a fabricated faith to the world and ensuring Roman Emperors were given places as heads of church and state. The slow but sure attempts to unite the Cults are even mentioned in the Bible itself, although written in a language which is "veiled" and cryptic:

*“Then I went down to the potter's house, and, behold, he wrought a work on the wheels. And the vessel that he made of clay was marred in the hand of the potter: so he made it again another vessel, as seemed good to the potter to make it.*

*Then the word of the Heavenly Father came to me, saying, O house of Israel, cannot I do with you as this potter? saith the Heavenly Father. Behold, **as the clay is in the potter's hand, so are ye in mine hand, O house of Israel...**And*

at what instant I shall speak concerning a nation, and concerning a kingdom, to build and to plant it”

**Jeremiah 18:1-9**

### A MATTER OF TIME

- Time itself was divided to reflect and commemorate the unification of the Cults.
- The year round was broken down into 12 months to honour the Solar Cult.
- Their god was the sun and his number was 12.
- The next division of time was a month and, as the word's etymology indicates, this was sacred to the Lunar Cult, whose chief tutelary deity was the moon.
- The next division of time is a week, in which the 7 gods of the Stellar Cult are honoured.
- These are today's days of the week.
- The worshippers of the god Saturn were given Saturday as a feast day, and since their god (planet) moves so gradually, the larger, longer cycles of time were attributed to him.
- And most importantly - The Full Moon Calendar was erased from Judaism and replaced by various others. The hands of a physical timepiece have, for generations, been concealed and revealed this sectioning of time according to the Cults.

The **hour hand** represents **Horus, the sun-god**. The **minute hand** stands for **Min, the moon-god**. The **fast-moving second hand** stands for **Mercury**, the god of the Stellar Cult, as do the 12 divisions. On elaborately designed watches and clocks, the hands often display circles upon them, to illustrate that they represent planetary orbs. Flags contain stars, moons, and solar orbs. **Islamic and oriental countries** still portray the **crests and stars**, which clearly indicate the actual origins of their religions. The use of symbols to convey meaning to the initiated and to conceal it from the uninitiated is as old as civilization. A clear understanding of the symbolic way of thinking is necessary if you are to unveil and comprehend the "esoteric" (hidden or secret) meaning of the symbols of ancient and modern times.

The descendants of the great Cults still exist today. They are in control of all the world's governments, as Jordan Maxwell has pointed out:

*“There is no government which is not **somewhat religious** and no religion which is not **somewhat political**...”*

Religion and Politics are two arms serving the same brain. I strongly want to urge our readers to follow their intuition and hear the Holy Spirit work in their minds. **Return to our Heavenly Father's organic clock. The Full Moon.**

**AND MAYBE YOU WILL TAKE YOUR WATCH OFF AND LOCK IT IN THE SAFE?**

I LEAVE YOU WITH THAT THOUGHT...

SHALOM SHALOM 🌻🌿

## DO GOOD BY GIVING BACK

Helping others is a humbling yet very uplifting experience - It is a biblical assignment for good reason!

**“THEY ARE TO DO GOOD, TO BE RICH IN GOOD WORKS, TO BE GENEROUS AND READY TO SHARE.”**

**1 TIMOTHY 6:18**

**SO, IF YOU WANT TO FEEL GOOD, DO GOOD 😊!**

HERE ARE SOME IDEAS:

1. **ALWAYS RECYCLE** – do your best not to purchase items that can't be recycled
2. **DON'T USE SINGLE-USE PLASTIC (PLASTIC BOTTLES OR BAGS)** – instead have a water bottle and reusable shopping bags on hand
3. **COMPOST** any food waste you have
4. **USE ENVIRONMENTALLY FRIENDLY, CRUELTY-FREE PRODUCTS** – personal care, household cleaners
5. **GROW** your own food

## EVER THOUGHT WHAT WOULD HAPPEN IF WE HAD A MOON “WOBBLE”? (Part 1)

The moon stabilises Earth's climate and our environment. Earth does not have perfect posture; it is tilted along its polar axis, circling the sun at an angle of about 23 degrees.

The moon acts as an anchor, preventing the Earth from varying its axial tilt by more than a degree or two.

Without the moon, our planet would likely **WOBBLE** about like an out-of-control spinning top, tilting a full 10 degrees every 10,000 years, and possibly oscillating the global climate between ice ages and hellish heat the likes of which no species has ever endured.

# EVER WONDERED HOW THE FULL MOON INFLUENCES SEA LIFE?

## Part 1

The moon impacts marine organisms' behaviours in all sorts of fascinating and unexpected ways! The **TIDES** are extremely important to organisms that live in the intertidal pools because they have to deal with being underwater half the time and exposed to air the other half of the time, which is a really challenging set of physiological stressors. Organisms that are used to being underwater all the time may find themselves trapped in a tidal pool which slowly heats up and runs out of air, all while having nowhere to hide from predators. In places with huge tidal ranges, the current from a tide going in and out is strong enough to carry many animals along with it. Yet they cleverly arrange themselves in their environment to take the blows.

### CAN THE FULL MOON BE AN APHRODISIAC?

Coral spawning is any big reef's most spectacular event of the year - where coral polyps release their eggs and sperm into the water to regenerate the future generation of corals. Triggered by water temperature and the lunar cycle, corals usually spawn on the nights following **OCTOBER**, **NOVEMBER**, and **DECEMBER FULL MOONS** - depending on the location of the reef.

During spawning, entire colonies of coral release their eggs and sperm simultaneously, creating a snowstorm-like phenomenon.

The moon is not the only environmental cue the corals use to achieve sexual synchrony on such a massive scale; water temperature and day length also matter. Yet the moon's presence seems to be crucial. If the sky is too cloudy, and the moon obscured, the corals will often not spawn. Sometimes they delay until the next **FULL MOON**.

Studies revealed that not only do corals have light-sensitive neurons tuned to the dim blue wavelengths of moonlight, they also have genes that change their activity level in sync with the **WAXING** and **WANING MOON**, regulating reproduction.

### BEST TIME TO FISH?

In fishing, this knowledge is used by fishermen to predict when fish are most active. Fishermen will easily find and catch fish during the new moon phase.

That said, certain species seem to be much more active during a full moon.

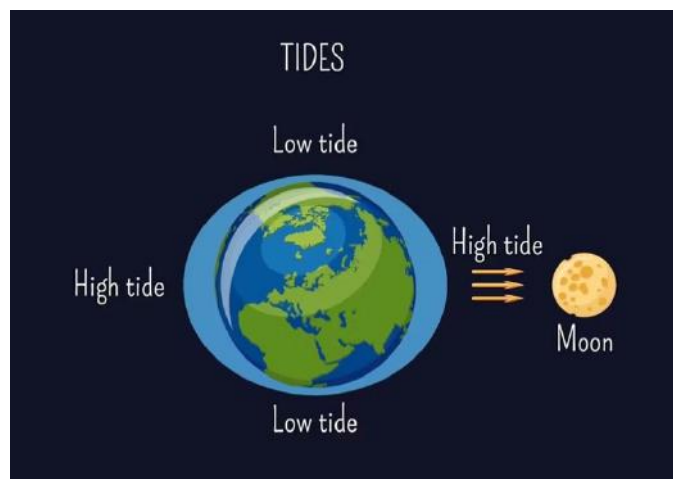

### ARE THERE WEATHER MANIPULATION AND TIDAL CONSEQUENCES IN YOUR AREA?

Sea shores have seen serious damage lately as weather patterns have been manipulated by governments and private enterprises like HAARP, which of course, will also throw the delicate cycle of our sea life into disarray.

Not only are human settlements destroyed but so is our sea life suffering which will impact our food security.

Contact the Green Scorpions (part of the Department of Agriculture, Forestry and Fisheries) with your complaint and observations on 0800 205 005.

**THE GRAVITATIONAL PULL OF THE MOON CAUSES TIDES TO RISE AND FALL.**

## HOW TO USE THE MOON AND STARS TO NAVIGATE?

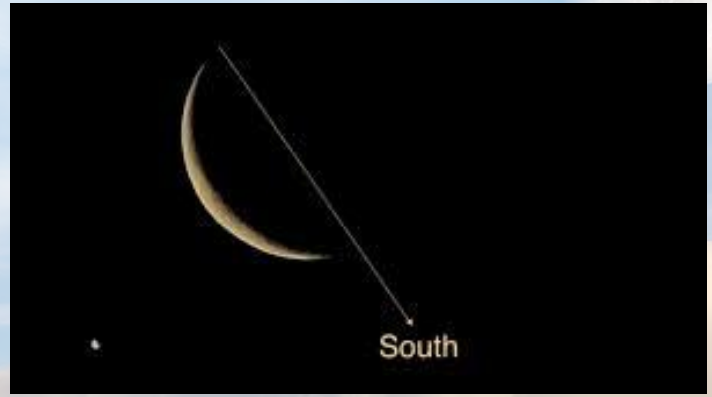

Without a compass, the stars and the moon are your friends. Much like the sun during the day, they can help you orient yourself and make map reading a bit easier.

Celestial navigation, finding one's way by using the moon and the stars, has been man's earliest navigational aid for thousands of years. Modern tools have made it simpler and more accurate, but the basic concept remains the same.

The moon, like the sun, rises in the east and sets in the west. Knowing how late it is in the evening and which side of the sky the moon is on will give you an idea of where the cardinal directions are. However, there are other methods of utilizing the moon and constellations that will yield more accurate results.

### QUICK AND EASY WAY TO USE THE MOON

In cases where the stars aren't bright enough or are washed out by other light sources, you can use the moon as a tool to help orient yourself. When it's cloudy and the stars aren't visible, you can use a crescent moon to help you find the south.

If you're looking at a crescent moon, you can use its pointed ends (or the horns) to help you find the south. From the tip of its horn on top, draw a line to its second horn at the bottom. Continue extending this line until it touches the horizon. The point where it meets the horizon is where the south is (if you're in the northern hemisphere). Be warned that this won't provide you with the most accurate result and you'll only get a rough estimate of where the south is, but for most situations, this should be helpful enough.

## A PLANETARY PARADE

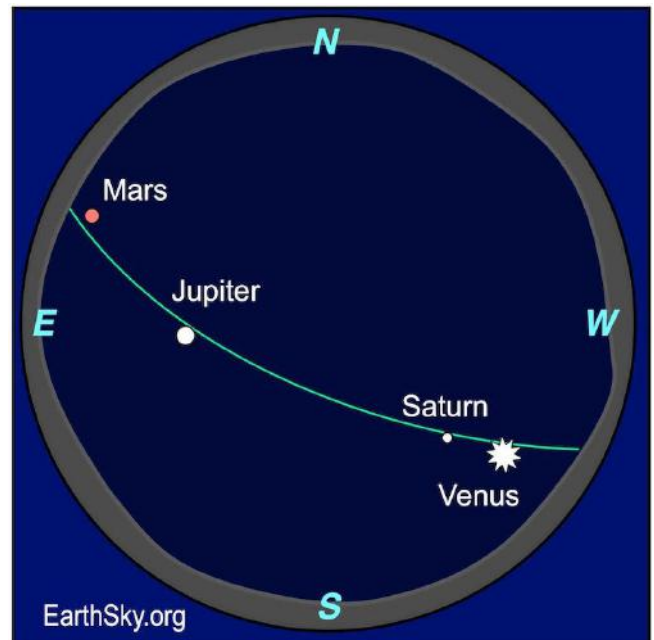

This month, you'll find these 4 planets in the evening sky. Look along the path the sun travels in the daytime. Venus, Jupiter and Saturn are up at sunset. Mars will be closest to Earth on January 12. And the moon and Mars will appear super close together on January 13, so close that – for some lucky observers – the moon will pass in front of Mars.

**Everyone on Earth** will see the **FULL WOLF MOON**. That night's full moon will lie near the bright red planet Mars. A full moon is also opposite the sun on **FULL MOON DAY**, 13 January.

If you look outside on the night of January 13 and don't see Mars ... that might be because it's behind the moon! Look near the moon and Mars for the twin stars of Gemini: Castor and Pollux.

The moon, Mars and twin stars will almost be in a straight line, and they'll be visible all night.

The waning crescent moon will lie close to red Antares on the morning of January 24, 2025. Antares is the brightest star in Scorpion the Scorpion. Observers in parts of Madagascar, south Australia, south Polynesia, and New Zealand will see the moon occult – or pass in front of – Antares at 0 UTC on January 25.

Others will see the moon close to Antares. Then it will lie between Antares and the horizon on the next morning. Look for them about an hour before sunrise.

Do you see a glow on the unlit portion of the moon? That's Earthshine. Its light is reflected from Earth.

## THE DANGERS OF UNCOOKED FRESH WATER FISH AND SUSHI

### PARASITES THAT CAN LEAD TO CANCER

Certain parasitic worms that can live inside the human body can also raise the risk of developing some kinds of cancer. These organisms are **FOUND IN BOTH** first-world countries and 3rd **WORLD COUNTRIES**. They can be a concern for people who **LIVE IN** or **TRAVEL** to other parts of the world too.

Opisthorchis viverrini and Clonorchis sinensis are liver flukes (a type of flatworm) that have been linked to an increased risk of developing cancer of the bile ducts. The bile ducts are tubes that connect the liver to the intestines. These infections come from eating raw or undercooked freshwater fish. They occur mostly in East Asia and are rare in other parts of the world. They may cause an enlarged liver, bile duct infection, gallbladder inflammation, gallstones and liver cancer.

Parasitic infections in humans are a major health problem in many tropical countries. Many of them are transmitted by infected drinking water or improperly cooked food, including raw fish.

Unwashed hands, dirty food preparation surfaces and kitchen utensils also play a role.

### HOW TO AVOID IT?

Cook fish before eating it, rather than simply serving it raw, cooking kills bacteria and parasites that can cause disease.

Nevertheless, some people prefer the texture and taste of raw fish. It is especially popular in cosmopolitan countries and in Japan as part of dishes like **SUSHI** and **SASHIMI**.

However, you can minimize this risk by buying raw fish from trusted vendors, restaurants or suppliers that have properly stored it at the correct temperatures and hygienically handled and prepared it.

The cooked fish sushi variety is safer.

**MOST IMPORTANT: Ginger and wasabi are regularly served alongside sushi, which, amongst other benefits, prevents antibacterial infections. Both are also full of antioxidants, meaning that they neutralise free radicals, which could help prevent multiple diseases, like cancer, diabetes, and heart diseases.**

## DEWORMING REMINDER

DEWORMING REGULARLY:

## PARASITE CLEANSE

WITH A FULL MOON, IT IS THE BEST TIME TO DO THE PARASITE CLEANSE 😊

### PARASITE CLEANSE RECIPE

#### Ingredients:

- 1 cinnamon stick
- 2 cloves
- 1 tablespoon of fresh grated ginger
- 1/2 tablespoon of oregano

#### Instructions:

1. Boil Water: Bring 4 cups of water to a boil in a saucepan.
2. Add Ingredients: Add the cinnamon stick, cloves, grated ginger, and oregano to the boiling water.
3. Simmer: Reduce the heat and let the mixture simmer for about 10-15 minutes.
4. Strain: Strain the tea into a cup or teapot.
5. Serve: Enjoy your parasite-cleansing tea hot.

## DO YOU KNOW?

### Pets can carry and pass parasites to people

Zoonotic disease is a disease spread between animals and people.

Some dog and cat parasites can infect people. Young animals, such as puppies and kittens, are more likely to be infected with roundworms and hookworms. Avoid animals licking your child's face or hands or your child playing in sand pits where pets can defecate also.

Wild animals such as rats, monkeys, bats and livestock like pigs and cows can also be infected with parasites that can infect people.
